

Dear Parents,

Your child can now log on with your help to Riverdeep, an online interactive learning computer program for math and reading.

In Destination Math for grades pre-K-1, the course lays a solid foundation as students learn important math concepts and skills that they will need to understand the world around them. In 30 sessions, they count from 1-100, identify shapes, add and subtract, compare and order numbers, and explore the concepts of money and time.

In course 1: Emergent Literacy and Phonemic Awareness for grades K-1, beginning learners develop phonics and comprehension skills through a structured whole-part-whole approach utilizing a variety of texts and skill building activities. Course 1 also emphasizes environmental print and phonemic awareness.

To get started:

Log on to <http://pilot6.riverdeep.net/lms>

Username: first name last name (school Number) 141

Password: birthmonth/birthdate **No spaces**

Example: 0703

If you have any problems logging on you can call Joshua Hamrick's mother, 221-5811.
